To Whom It May Concern:

Re: Church & Dwight Co., Inc. Allergen Program

Church & Dwight Co., Inc. Arm & Hammer™ Sodium Bicarbonate, Sodium Bicarbonate blends, and Flow K™ Potassium Bicarbonate are made with inorganic raw materials. No allergens or sensitizers are used in their production, come into contact with the manufacturing equipment or otherwise share the bicarbonate manufacturing space.

Loose peanuts and treenuts have been removed from vending machines. Food storage and consumption is limited to designated areas and hand washing before returning to work is expected.

Allergen awareness training is provided to all employees annually, and effectiveness is evaluated through hygiene inspections.

Feel free to contact me with any questions.
