To Whom It May Concern:

**Re: Aluminum in Church & Dwight Co., Inc. Arm & Hammer™ Sodium Bicarbonate**

This letter confirms that Church & Dwight Co., Inc. Arm & Hammer™ Sodium Bicarbonate is prepared without the use of aluminum or aluminum compounds.

Aluminum is not part of the regular Sodium Bicarbonate USP or Industrial specification, but it is limited for a different end use that Church & Dwight supplies regularly. (It is tested daily.) For that application, a 2ppm limit is required, and Church & Dwight Sodium Bicarbonate is always below that level.
