To Whom It May Concern:

**Re: Potential for Food Fraud associated with Arm & Hammer™ Flow K™ Potassium Bicarbonate**

The Church & Dwight manufacturing locations for Arm & Hammer™ Flow K Potassium Bicarbonate have undertaken vulnerability assessments with regard to the potential for food fraud associated with the product. The assessments concluded that the risk is negligible and that the current controls for supplier management (the potassium bicarbonate / finished product is sourced from our joint venture with Occidental Chemical, Armand Products Company), the in-house blending system, tamper evident packaging and transportation inspection practices are adequate. We are not aware of any instances of food fraud involving potassium bicarbonate.

Feel free to contact me with any questions.
