To Whom It May Concern:

Re: Engineered Nanomaterials – Arm & Hammer™ Sodium Bicarbonate

Church & Dwight Arm & Hammer™ Sodium Bicarbonate (including USP, Food Grade and Industrial) is not considered to be an engineered nanomaterial and does not meet the definition of nanomaterial from European Union Commission Recommendation of 10 June 2022 (2022/C 229/01).

Testing was conducted by laser diffraction and no (0%) particles less than 0.1 microns (100 nanometers) were detected.
