To Whom It May Concern:

**Re: Church & Dwight Arm & Hammer™ Sodium Bicarbonate, Ammonium Bicarbonate and Flow K™ Potassium Bicarbonate - Per- and polyfluoroalkyl substances (PFAS) Inquiry**

The subject bicarbonates are not products of chemical synthesis involving PFAS or PFAS precursor chemistry components.

PFAS are not intentionally added to the subject bicarbonate products.

No cleaning or maintenance solvents relevant to the production or packaging of the supplied material are used.

The manufacturing equipment used to produce and package the bicarbonates may contain parts made of food grade PTFE.

No testing is performed for the presence of PFAS or PFAS precursors in the bicarbonates.

Feel free to contact me with any questions.
