To Whom It May Concern:

Re: Kudos Blends Limited KODA[®] Potassium Bicarbonate Stability and Storage

Properly stored, Kudos Blends Limited, KODA[®] 50 MB Potassium Bicarbonate and KODA[®] 100 MB Potassium have a shelf life of at least 36 months from the date of manufacture.

Store in cool, dry areas and away from incompatible substances such as strong acids and bases. KODA[®] Potassium Bicarbonate reacts with acids to yield carbon dioxide gas, which can accumulate in confined spaces. Avoid prolonged contact with aluminum, brass, copper, lead tin, zinc or other alkali sensitive alloys. Heating may cause decomposition, releasing carbon oxides. If opened, reseal immediately to mitigate shelf life loss.

KODA[®] Potassium Bicarbonate may be stacked on pallets or racks. It is recommended that pallet stacks not exceed three high to prevent compaction. Shipments of pallets should be single stacked and the condition of the shipping vehicle should be checked for cleanliness and odor. If a bag is torn during warehouse handling or during loading on/ off a vehicle, the bag should be removed from the unit and destroyed.

Please feel free to contact me with any questions.
